**Marking 20 years of success,
INTERAL OPENS ITS TORONTO OFFICE**

Quebec City, February 28th, 2011. With 20 years of experience in the development of maintenance and management software, and 500 clients in North America, Europe and Africa, INTERAL has now opened an office on Yonge St. in Toronto. "This was the logical next step," explained INTERAL associate, Yves Gagnon. "If we want to penetrate major industries in Ontario and Western Canada, we need to go to them."

INTERAL maintenance software is already widely used by well-known Canadian companies such as Alimentation Couche-Tard Inc., Transcontinental Inc., Héroux-Devtek Inc., A. Lassonde Inc, Produits Forestiers Universal du Canada Inc., Simo Management Inc. and Spectra Premium Industries Inc., to name just a few. "Our software is used by a broad range of industries both for our maintenance, procurement and inventory management solutions and for our time and attendance, and production management solutions," Yves Gagnon pointed out. "It's sure to be a success in the west in the public and private building management, manufacturing, agrifood, natural resources, high technology, energy, the environment and transportation sectors."

INTERAL has developed tools to fully integrate every area and application, including corrective maintenance, preventive maintenance, conditional maintenance and predictive maintenance. Clients appreciate the flexibility and performance of its interactive modules. Easy to install and user-friendly, clients can also count on a solid technical support team.

"Over the years, we have built partnerships in a number of countries worldwide because the need for our products was widespread. We also worked on adapting our software to the maintenance requirements of many different industries, which were also expanding. Today, we are ready to offer the kind of innovative, user-friendly solutions that Canada's industries need," Yves Gagnon said in closing.

About INTERAL

For 20 years, INTERAL has offered businesses a full range of products and services along with the implementation of data management solutions adapted to the needs and requirements of today's industries. In addition to developing and implementing software solutions, the company provides training, tools and solid support for its clients in their computerization and planning strategies for maintenance, procurement, time and attendance, and production data management. Backed by a strong team of industrial designers, engineers, analysts, technicians and expert trainers, INTERAL has made its mark in new technologies in many different sectors of activity and on North American, European and African markets.
